

Assignment -1:Write two scripts for daily standup meetings.

Here are two scripts for a daily standup meeting:

Script 1

Scrum Master: Good morning, team! Let's get started with our daily standup meeting. Please keep your updates short and clear. We will go through what you accomplished yesterday, your plan for today, and any blockers you might have. Let's start with Abhishek.

Abhishek: Good morning! Yesterday, I worked on the design part for tracking movie tickets. It's almost done, and I've pushed the updates to the Git repository. Today, I will be finalizing the design and starting to integrate it with the main system. I don't have any blockers.

Scrum Master: Great, thanks Abhishek. Ankit, you're up next.

Ankit: Hi, everyone. Yesterday, I worked on the notification part for movie ticket booking. Some parts of the tracking feature are still pending, which I plan to complete today. I don't have any blockers related to tracking.

Scrum Master: Thank you, Ankit. Does anyone else have any updates or blockers to discuss? (Allow other team members to share their updates)

Scrum Master: Thank you all for the updates. If anyone has any issues or challenges, please stay on the call so we can discuss them further. Otherwise, have a productive day! Meeting End: 9:15 AM

Script 2 :

Scrum Master: Good morning, team! Let's begin our daily standup. Please keep your updates concise: mention what you did yesterday, what you plan to do today, and any blockers you're facing. Let's start with Abhishek.

Abhishek: Good morning! Yesterday, I worked on the user interface for the movie ticket booking page. I have completed the initial layout and styling. Today I will focus on implementing form validations and error handling. I don't have any blockers at the moment.

Scrum Master: Thanks, Abhishek. Ankit, you're next.

Ankit: Hi, everyone. Yesterday, I was working on the payment gateway integration for our movie ticket booking system. I managed to set up the basic framework and started testing. Today, I will continue testing and debugging. I'm facing a minor issue with the payment gateway API, but I'll resolve it soon.

Scrum Master: Thanks, Ankit. Any other updates or blockers? (Allow other team members to share their updates)

Scrum Master: Thank you all for your updates. Remember to stay focused and have a great day!

Meeting End: 9:15 AM
