

Assignment 2: Explain the responsibilities of scrum role .

Here are the responsibilities of Scrum roles:

A. Scrum Master:

- Facilitate daily Scrum meetings (daily standups)
- Lead sprint planning meetings
- Conduct retrospective reviews
- Keep a pulse on team members through individual meetings or other means of communication
- Manage obstacles that arise for the team by communicating with stakeholders outside of the team
- Ensure the team is following Scrum principles and practices
- Remove impediments that obstruct the team's progress

B. Product Owner:

- Manage the product backlog by ordering work by priority
- Ensure the product backlog is up-to-date and visible to the team
- Make decisions about product features and requirements
- Act as the voice of the customer and stakeholders
- Provide clarity on product vision and goals
- Prioritize product backlog items based on business value and customer needs

C. Development Team:

- Develop and deliver working software in each sprint
- Collaborate to complete tasks and achieve sprint goals
- Estimate effort and complexity of backlog items
- Participate in sprint planning and commit to sprint goals
- Work collaboratively to resolve issues and overcome obstacles
- Continuously improve processes and practices
- Deliver high-quality software that meets the Definition of Done (DoD)

Note: These responsibilities are not exhaustive, but they provide a general overview of the roles and expectations in a Scrum team.
